

THE BUSINESS OF FISHING

CHARTING A COURSE TO SUSTAINABLE
AND PROFITABLE UK FISHERIES

A JOURNEY INTO FISHERIES SCIENCE AND MANAGEMENT

3-day course
12th-14th June
Aberdeen Area

In 2017, our industry is about more than just catching fish. It is a complex business and science is pivotal.

This residential training course seeks to bring all who attend on a journey into the what, when and why of fisheries science and management. You will work with other like-minded professionals in a neutral setting to explore and interrogate the processes involved, share insights and build understanding away from the pressures of fishery regulation.

The course has been built with the help of fishermen: it will meet your needs by complimenting your current knowledge whilst providing you with practical opportunities to go deep 'under the bonnet' of fisheries science and management. We hope it will stretch your thinking but no in-depth scientific knowledge is needed to enrol; just come with an open mind and a willing spirit.

Apply for the course online at www.fishingintothefuture.co.uk/training. All meals and accommodation are provided; travel support and other incentives are available for course participants.

Date: 12th-14th June 2017

Location: Aberdeen Area

Please call our team with any questions:

- **Jim Masters** (Fishing into the Future) on 01803 659219 or 07900244507.
- **Mike Park** (Scottish White Fish Producer's Association) on 07710504773.
- **Derek Cardno** (Scottish Fishermen's Federation) on 01224 646944 or 07545 429314.
