

MARCH 6TH – MARCH 8TH 2018

Dartington Hall, Devon

Workshop for Fishermen:

An Introduction to
Sustainable Fishing

"This is definitely a course that fishermen should attend, it puts them right in the picture."

Donald Anderson, fisherman.

- **Are you a fisherman, passionate about your industry and concerned for its future?**
- **Are you keen to participate in fisheries science and management but need the tools?**
- **Are you interested in how to build a sustainable fishery and want to find out more?**

This industry-backed, 3-day residential training workshop for fishermen which aims to take participants on a journey into the what, when and why of sustainable inshore fisheries science and management.

During this course, which is designed by fishermen, for fishermen, you will explore and interrogate the processes involved, share insights and build understanding with key people in the industry, away from the pressures of fishing. All who participate stand to benefit from the two-way conversations at this workshop: fishermen leave more comfortable working with scientific information and management processes; policy-makers and scientists learn the inner-workings of the fishing industry.

The workshop will be of interest to all sectors, but is aimed at inshore fishermen from the south and south west of England. We hope the workshop will stretch your thinking; no in-depth scientific knowledge or prior learning is needed - just come with an open mind and a willing spirit to participate.

All meals, accommodation and travel are paid for. We respect the value of your time away from fishing and are offering a 'tie-up' payment of £200 for fishermen who complete the course.

PLACES ARE LIMITED – APPLY EARLY

- Apply online at www.fishingintothefuture.co.uk/training
- Call us with any questions: **Jim Masters** (Fishing into the Future: 01803 659219 or 07900 244507; **Alan Steer** (South Devon & Channel Shellfishermen: 07968 483588) or **Gus Caslake** (Seafish – 01209 713162)

This programme is supported by: EMFF, Morrison's Foundation and Seafish SW Advisory Group
