

Fishermen: Join us on our celebrated [Business of Fishing](#) course

Based at the rural setting of [Thainstone House](#) in Inverurie near Aberdeen, we take all participants on a journey in to the what, when and why of fisheries science and management. You will be working with like-minded professionals from across the industry to: explore and interrogate the processes that govern your livelihoods; share insights and experience; build common ground.

Designed by fishermen, scientists and managers working together, this course puts you in charge, addressing issues such as:

- How are our fisheries measured and what role does science play?
- How are our fisheries and fishing opportunities managed?
- What can we do to get the best value from our catch?
- How can I make a difference to fisheries science and management?

[Apply online](#) to attend the course, or visit www.fishingintothefuture.co.uk/. All meals and accommodation are provided; some travel support is available for participants.

Please call our industry team with any questions:

- Mike Park (SWFPA) on 07710504773.
- Kenny Coull (SWFPA) on 07718483600.
- Derek Cardno (SFF) on 01224 646944 or 07545 429314.
- Jim Masters (Fishing into the Future) on 01803 659219 or 07900244507.

How ready are you for the future of your industry? #BOF19

"I will be telling fishermen this is definitely a course they should be attending – it puts them right in the picture".

Donald Anderson – Fisherman (Business of Fishing graduate, 2017)
