

SUSTAINABLE FISHERIES
EDUCATION PROGRAMME

INTRODUCTION TO SUSTAINABLE FISHING

Fisheries Science and Management for Inshore Fishermen

Free event
Limited seating
Apply now!

"I'd recommend all fishermen attend this programme, it puts you right in the picture."

"We should have done this 40 years ago."

The Introduction to Sustainable Fishing programme (#ISF2020) provides fishermen, and others with an interest in productive fisheries, with an opportunity to learn how fishery science and management processes are applied in England.

Our programme is tailored specifically for inshore fishermen and brings together commercial, charter and recreational fishermen with scientists, managers and other marine resource professionals to learn the processes, share their insights and network in a neutral and professional setting. Participants leave the programme empowered and better prepared to be a voice in UK fisheries management.

Applications can be completed at www.fishingintothefuture.co.uk/course/isf2020/ or you can contact one of the programme representatives listed below. The programme is free to attend, meals and accommodation are provided during the event, and travel support is available for most applicants. Selected applicants will be notified by email or phone.

For questions about the programme, please call **David Stevens** (commercial fisherman) 07774 752374; **Peter Williams** (commercial fisherman) 07714 276502; **Mike Warner** (SAGB) 07885 287160 or **Jim Masters** (Fishing into the Future) on 01803 659219 or 07900244507.
