

CALLING ALL FISHERS:

Do you have ideas for fisheries research?

#FishingForScience

Tell us your idea for a research proposal and we could help you to turn it into a fully funded study.

Project proposals should seek to:

- Improve data collection, particularly for data-limited species,
- Enhance knowledge of technical measures including fishing gear selectivity,
- Build a better understanding of the environmental impacts and benefits of aquaculture.

How to get involved/started: Contact the ***Fishing Animateurs*** at fishing@cornwallrcc.org.uk or call on 01736 362782 / 07534580450 to share your ideas.

OR visit our website <https://www.fishinganimateur.co.uk/>

Please note, we have no formal or informal relationship with DEFRA
